

STATIONARY SOURCE APPLICATION INSTRUCTIONS

FEES: General Applications - Filing Fee: **See Filing Fees Checklist**. Note: The Engineering Analysis and other fees will be billed after a review is complete.

Gasoline Dispensing Facilities: See Filing Fees Checklist

AUTHORITY TO CONSTRUCT: Any person constructing, building, erecting, altering or replacing any article, machine, equipment or other contrivance, the use of which may cause, eliminate, reduce, or control the issuance of air contaminants, shall first obtain authorization for such construction from the Air Pollution Control Officer. An authority to construct shall remain in effect until a permit to operate the equipment is granted or denied or the application is canceled. An authority to construct shall expire no later than two years from the date of issuance, unless an extension is granted. **A filing fee (See Filing Fees Charge Sheet) should accompany each application for an authority to construct and/or operating permit. Additional fees will be charged, after upon approval.**

PERMIT TO OPERATE: Any person operating an article, machine, equipment or other contrivance, the use of which may cause, eliminate, reduce or control the issuance of air contaminants, shall first obtain a written permit from the Air Pollution Control Officer. No permit to operate shall be granted either by the Air Pollution Control Officer or the Hearing Board without authorization as required by District Rules and Regulations, until the information required is presented to the Air Pollution Control Officer and the equipment or process is altered, if necessary, and made to conform to the standards set forth in the Rules and Regulations, and in the California Health and Safety Code.

FORM COMPLETION: The Authority to Construct and Permit to Operate Application form must be filled out completely. One form must accompany each application for (1) authority to construct for a new or modified facility; (2) permit to operate a facility for which no application for authority to construct was required or submitted; (3) emission reduction credit due to equipment shutdown, reformulation, or installation of abatement equipment.

INFORMATION REQUIRED: An application for an authority to construct or permit to operate for a new or modified stationary source of air contaminants shall give all the information necessary to enable the Air Pollution Control Officer to make the determination that every article, machine, equipment or other contrivance, the use of which may cause, eliminate, reduce, or control the issuance of air contaminants, is so designed, controlled, and operated with such air pollution control equipment that it may be shown to operate without emitting or without causing to be emitted air contaminants in violation of the District's Rules and Regulations or of such state or federal statutes as may be enforceable by the Air Pollution Control Officer. In addition, the Air Pollution Control Officer may require such information as may be deemed necessary to describe the equipment and/or processes to be permitted.

Applicants are requested to use the Stationary Source Application Checklist to identify forms or instructions which may clarify application requirements for certain processes or category of source.

STATIONARY SOURCE APPLICATION CHECKLIST

The Placer County Air Pollution Control District's "List and Criteria for Required Application Information" gives all the information that may be requested as part of the permit application process. As an aid to applicants, this checklist identifies the minimum that is required for an application to be accepted. If the forms are not completed or the minimum required information is not provided, your application will be returned. Check the items you have completed and/or enclosed as part of the application.

- 1. **Fees** submitted with application:
 - General Applications** - Filing Fee: **See Application Filing Fees Checklist** (Note: The Engineering Analysis and other fees will be billed after a review is complete.)
 - Gasoline Dispensing Facilities:** **See Application Filing Fees Checklist** (Sacramento Valley Basin Control Council fee does not apply if West of Range 9E, near Clipper Gap, CA) (Minor Source, one-time charge, for new facilities and does not apply to facilities which have previously paid this fee.)
- 2. **Authority to Construct/Permit to Operate Application Form.** Complete each section of the form and sign the application.
- 3. **Facility Map.** Blueprints, diagram, or sketch, drawn roughly to scale that locates equipment and emission points on parcel, and the distance of emission sources to the property line and to the nearest off property structures.
- 4. **Flow Diagram.** Blueprint, diagram, or sketch showing the sources of air pollutants, the flow of air pollutants, control devices, and discharges to the atmosphere. (Not Applicable for Boilers, Gasoline Dispensing, Dry Cleaners, Automotive Refinishing, Graphic Arts, Wood Coating, or Engines).
- 5. **Technical Information Forms Required.** Please attach the appropriate Technical Information along with a Description of the Proposed Project.
 - A. Automotive Refinishing Form
 - B. Boilers, Steam Generators, Process Heaters, or Kilns Form
 - C. Concrete Batch Plant
 - D. Dry Cleaner Form
 - E. Engine Form
 - F. Gasoline Dispensing Facility (New, Retail, Non-Retail and Existing) Form
 - G. Graphic Arts Operation Form
 - H. Wood Coating Operation Form
 - I. Vapor Vacuum Extraction Form
 - J. For other processes, please contact the District's Permit Engineer at 530-745-2330.
- 6. **Air Emission Estimate.** (If your project is not described in 5.A. through 5.I., provide the basis for the air emission estimate in the Authority to Construct application Box 22, and identify any toxic compounds that may be emitted to the atmosphere.)
 - A. Include emission factors, air pollution control device efficiencies, mass balance calculations, raw material/fuel usage, MSDS or raw material specification sheets, etc. that support the estimate of emissions provided.
 - B. For air toxic compounds, identify the compounds, the emission point(s), and maximum quantity discharged per hour.

Please submit this checklist with your application. Your application will not be filed without the fees, forms, and information identified above. Once the application is accepted and filed the District will conduct a technical review of the application for completeness and process it.

Invoice(s) (check only one)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Identify all emissions violations for which a notice of violation was written and a variance was not in effect at any facility owned or operated by the applicant in the state in the last three years prior to the date of application. If no emission violations, check this box <input type="checkbox"/> None			
Identify prior CEQA review - Please indicate whether or not the subject of this permit has been previously reviewed under the California Environmental Quality Act. <input type="checkbox"/> Yes <input type="checkbox"/> No If Yes, provide a copy of the environmental documents or indicate the name of the document and which agency approved it.			
Statement of Company's Responsible Person "I am familiar with the Rules and Regulation of the Placer County Air Pollution Control District and I certify that the information herein and the data submitted with the application is true with regards to the operation of the plant and /or equipment which is the subject of this application and that such operation will comply with said Rules and Regulations." The applicant/permittee has an obligation to defend and indemnify the District against third party challenges in accordance with District Rule 411, Indemnification of District. Signature of Company's Responsible Person _____ Title _____ Name (Printed or Typed) _____ Date _____			

PLACER COUNTY AIR POLLUTION CONTROL DISTRICT

ADDITIONAL TECHNICAL INFORMATION VAPOR VACUUM EXTRACTION

1. Company Name: _____

2. Operating Schedule:

a. Maximum Hours of Operation per day: _____

b. Maximum Hours of Operation per quarter: _____

3. Equipment Location Drawing:

The drawing or sketch submitted, on separate paper, must show at least the following:

a. The property involved and outlines of all buildings on it. Identify property lines plainly.

b. Location and identification of wells and treatment system.

c. Location of stacks.

d. Location of the property with respect to streets and all adjacent properties. Identify adjacent properties.

4. Equipment Description:

a. General Description: _____

b. Manufacturer: _____

c. Model: _____

d. Blower Rating: _____

e. Maximum Flowrate: _____

f. Description of Control Equipment, including Destruction Efficiency: _____

g. Exhaust Temperature: _____

h. Exhaust Flowrate: _____

i. Stack Height: _____

j. Stack Diameter: _____

k. For combustion equipment, provide:

Fuel Type: _____

Btu/hr rating: _____

Horsepower: _____

5. List the contaminants (gasoline, diesel, other): _____

If gasoline, does it contain MTBE? (Check one) Yes No

6. Does the soil contain vinyl chloride, trichlorethylene, perchlorethylene, or methylene chloride? Yes No

7. Estimate the maximum total VOC emissions in lbs/hour, lbs/day and lbs/quarter:

8. Estimate the total emissions of benzene (and MTBE contaminants, if applicable) in lbs/hour, lbs/day and lbs/quarter.

Benzene

MTBE

_____ lbs/hour

_____ lbs/hour

_____ lbs/day

_____ lbs/day

_____ lbs/quarter

_____ lbs/quarter

9. Provide information about receptors within 500 feet (none, residential, commercial, or other): _____

10. Is a school located within 1,000 feet of the project? (Check one) Yes No

11. Provide a preliminary screening risk assessment.
